

Environmental Goals

Help students become environmentally aware so their own actions will help to build a balanced environment

- Students will demonstrate an understanding of the natural environment and the interrelationships among natural systems and people.
- Students will develop an understanding and commitment to environmental stewardship.
- Students will be able to identify, investigate and evaluate environmental problems and issues, be able to communicate this understanding to others, and use this information as they become active citizens
- Students will develop an understanding and appreciation of the many different recreational opportunities that exist in the natural environment and how their recreational activities impact environmental systems

Guiding Principles

- Providing a solid Foundation in the basics of Reading, Writing, Math
- Environmental Focus integrating environmental concepts throughout the curriculum
- Experiential Hands-on Learning
- Extended Classroom Experiences – Outdoors
- Active Stewardship of Environmental Resources
- Increased Awareness of Environmental Impact- Locally & Globally
- Safe & Nurturing Environment
- Meaningful Partnerships with Parents and Environmental Partners
- Focus on Life Skills such as... Leadership, Responsibility, Accountability, Communication & Collaboration Skills, Critical Thinking & Problem Solving
